5 CORUM'S GOLDEN TOURBILLON PANORAMIQUE

With only 66 pieces in gold and five pieces in platinum, Corum's Golden Tourbillon Panoramique is the final result of a subtle blend of successful ingredients. The rounded case is fitted with an 18-carat gold crown. The open-worked dial with the black hands are protected by a glare-proof sapphire crystal. Genuine black or brown crocodile leather straps are connected by an 18-carat gold mechanical fastening triple folding clasp. This is definitely a watch with a heart transformed into a greater level of art.

6 BLU MAJESTY ORBITING TOURBILLON

Recreating the wonder of planetary motion in a dial that seems still and a tourbillon that appears to fly is Blu's Majesty Orbiting Tourbillon. It offers a unique expression of the planetary motion of time. This first edition of the unique timepiece is available in 18-carat white-gold case with a dial of engine-turned silver. The bezel is screwed upon and the sapphire crystal ring case which allows a flood of light through underscores an impression of spatial depth.

7 A LANGE AND SOHNE LANGEMATIK PERPETUAL

The rose gold case and black dial execution for A. Lange and Söhne Langematik Perpetual is the first self-winding wristwatch with a perpetual calendar and omelette dial. This biological timepiece also boasts a zero-reset mechanism that allows the moon phase indicator and calendar displays to be advanced individually or together with a single push-piece. Committed to perfection, this timepiece is a technical marvel beloved for generations. There are only 25 pieces of this limited edition collection.

8 IWC'S PORTUGESE REGULATEUR TOURBILLON

This special three-piece IWC Portuguese Regulateur Tourbillon boasts a regulator mechanism: its movement (maine tourbillon) that allows balance with high precision adjustment cam on the balance base. This summer is nobly encased in rose gold with a sapphire glass back. The leather straps are connected by rose gold lugs extending from the case. Simplicity is at its best with this timepiece.
