

**Blu  
MT3**

The MT3 rotates on three separate axes. The watch ingeniously incorporates three tourbillons into a masterful design. Two of the three axes are mounted in a linear arrangement that helps to maintain the system on the same plane. This wristwatch is from a limited edition of just 50 pieces, and each comes individually numbered. It is available in gold, and only 20 pieces are made available in platinum. Each tourbillon is hand-finished with the craftsmanship of the master watchmaker Bernhard Lederer and his team. Unique versions can be made upon request.

**Movement:** Mechanical with manual winding

**Functions:** Hours (on 12-hour tourbillon cage), minutes (on one-hour tourbillon cage), seconds (on one-minute tourbillon)

**Case:** White gold or red gold 43 mm x 15 mm. The case band is made of sapphire crystal; the bezel is screwed to the case back with twelve columns, covered by reflective sapphire crystal and completed with cylindrical strap lugs

**Dial:** Two flying and one half-flying tourbillon oscillation system and twin serially operating spring barrels with a power reserve of approximately 72 hours—all components are finished by hand
